DETAILED ACTION

Response to Amendment

1. Applicant's response filed July 10th 2006 has been entered and made of record. Applicant has amended claims 1 and 2. Claims 1-3 are pending.

2. Applicant's remarks in view of the amended claims have been fully considered and found persuasive. Claims 1-3 are accordingly in condition for allowance. Reasons for allowance are given below.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mark Yaskanin Reg. No. 45,246 on September 4th 2007.

Please amend page 1, lines 7 and 8 to correct the typographical error "Ser. No. 0558,094" to read "Ser. No. 09/558,084".

Page 6 of the specification should be amended such that between lines 21 and 22 the following line of text is inserted:

"FIGURE 2C is a partial circuit diagram of a switchable filter scheme."

Page 7 of the specification should be amended such that in line 3 the phrase: "FIGURE 10 illustrates" should be replaced with the phrase: "FIGURES 10A and 10B illustrate".

Also page 7 of the specification should be amended such that in line 8 the phrase: "FIGURE 12 is a flowchart" should be replaced with the phrase: "FIGURES 12A and 12B are a flowchart".

Page 20 of the specification should be amended such that in lines 2 and 3 the phrase: "FIGURES 2A and 2B show" should be replaced with the phrase: "FIGURES 2A, 2B and 2C show".

Page 35 of the specification should be amended such that in line 12 the phrase: "FIGURE 12 shows" should be replaced with the phrase "FIGURES 12A and 12B show".

Allowable Subject Matter

4. Claims 1-3 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's arguments provide detailed explanation of the distinguishing limitations now presented in claims 1-3. In summary the combination of Green and Sitzo does not teach or fairly suggest the limitation of thresholding each spectral channel independently (claim 1) or each set of composite pixel values independently (claim 2) or each cell event in each spectral channel independently (claim 3). No other found prior art of record teaches or fairly suggests this limitation. Claims 1-3 are accordingly allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
